

## Bass Marimba | C Major Diatonic Scale

Description:

This bass marimba is a pitch-accurate melodic bar percussion instrument suitable for use in the classroom, pre-schools, music rooms, or the home. It is institutional quality and is not considered a toy.

The low tones of the C28D are especially appealing and enjoyable to play.

Notes represent the C-Major (diatonic) scale with the lowest pitch starting at Bass C (C2) and the top note Tenor C (C3).

Bars are made of straight-grained African Padauk. Resonator box is made from poplar. Finish is a semi-gloss, water-based clear coat that is wear-resistant to normal handling and playing. Rounded corners are employed to provide child-friendly surfaces. Yarn wound mallets and Users Guide are included.

For easy access to the playing surface, a riser platform is available that will raise the height of smaller players by 10-inches.

Specifications:

<b>Model:</b>	C28D
<b>Number of Octaves:</b>	1
<b>Number of Notes:</b>	8
<b>Scale / Pitches:</b>	Diatonic / C, D, E, F, G, A, B, C
