

1-Octave Diatonic Bass Marimba

Description:

This C-major scale diatonic bass marimba is a pitch-accurate, melodic bar percussion instrument suitable for use in the classroom, pre-school, music rooms, or the home. These instruments are institutional quality and are not considered toys. The low tones of the C28D are especially appealing and enjoyable to play.

Bars, made of mahogany, are individually tuned and finished by hand. Resonator box is made from birch hardwood and plywood. Finish is a clear semi-gloss, water-based Polycrylic® that is wear-resistant to normal handling and playing. Rounded corners are employed to provide child-friendly surfaces. The instrument is mounted on rubber casters for ease of moving around. Yarn wound mallets are included.
