## BASS MARIMBA

MARIMBA  
ONE

Shown in  
Natural Finish

### DESCRIPTION

Marimba One is a percussive Bass instrument that descends down to Cello "C". It has a full rich mellow tone that could augment the range of an existing Marimba or make an ideal companion to any percussion ensemble.

The **Bass Marimba** can be made to accommodate any scale, set of frequencies, even ratios to 13 notes and more. It also comes in optional finishes, such as; "Studio" (gloss black frame with textured grey resonators), "Natural" (left in natural wood hue), or whatever the Musician desires.

All materials are hand picked for maintained quality. The **blocks** are Philippine Mahogany coated with a durable playing surface that will hold up under years of use. Each **resonator** has a stopper which can be adjusted to obtain an optimum coupling with its block. The **frame** is extremely rugged utilizing heavy bracing for maximum supporting strength. This instrument is mobile, it breaks down for transporting, and is essentially maintenance free.

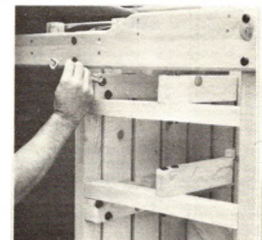

The **Bass Marimba** will compliment any array of instruments and will please the most discriminating performer and audiences.
